CHILD PROTECTION TRAINING

Children today face more risk of being approached online by traffickers than ever before, which is why we created a free, 60-minute on-demand training: Keeping Kids Safe in the Digital World. This training includes information and practical exercises that will equip you to create a safe online environment for your children.

ABOUT THE SELF-PACED TRAINING

Keeping Kids Safe in the Digital World was created for parents, educators, caregivers, and all those who wish to protect a child from online predators. Move at your own pace, pause, and resume as you proceed through the 60-minute course.

The training is broken into three interactive modules:

01

Online Exploitation

This module covers these key topics: 1) What online exploitation is and where it happens? 2) How exploitation can lead to human trafficking? 3) Why youth are vulnerable? 4) How predators and traffickers identify and manipulate victims online? 5) Signs of potential victimization.

02

Digital Safeguarding

In this module, you will discover important digital safeguarding tools and techniques. Through interactive scenarios, personal reflection, and engaging videos, you will learn how to use the 3 Ts of Online Safety. Upon completion, you'll be empowered to take action immediately!

03

A True Story

In the final module, you'll follow an average American teenager as he becomes a victim of online exploitation. It will be up to you to intervene at the most important moments to keep him safe. You'll walk away feeling confident in your ability to apply the 3 Ts of Online Safety with any kid in your life.
