

At-Home Math HELP

Is my child struggling in math? Try these activities to increase your child's math skills.

****MATH FACTS**** (Addition-Subtraction-Multiplication-Division)

*By knowing math facts automatically, students will be able to understand concepts of operations and algebraic thinking, number and operations in base of ten, number and operations with fraction, and the number system.

The car and flashcards are a great place to practice math facts. Here are some great free math apps and websites to use for practice. Good old fashioned practice is the best way to practice.
