

**Excelsior Academy
School Land Trust
Final Report 2021-2022 School Year**

School Goal

Excelsior Academy will use RISE testing results to measure progress in our language arts classes. Our baseline measurement is our 2018-2019 SAGE language arts scores, which were 45 percent. Our completed measurement will be to show growth in the RISE scores for 2021-2022.

Final Report Questions

Answer one of the following: If we do the graph, we would answer number two.

1. Explain how academic performance was improved or not, and describe how the before and after measurement data supports the improvement.
2. Explain how academic performance was improved or not, and attach measurement data from before and after plan implementation in the Attachments Section below. (If you choose this option, please put a note in your explanation to "see attached document").

ANSWER: While these results do not show improvement from our baseline measurement data shown in 2018-2019, we show improvement from the 2020-2021 school year to the 2021-2022 school year. We believe the decrease in scores was due to learning loss during the pandemic. We are making progress in closing the gap due to the affects of the pandemic. See the attached document.

School Year	ELA RISE Proficiency	Explanation
2018-2019	45%	Pre-pandemic school year
2019-2020	NA	We lost half a year of in person instruction due to the pandemic
2020-2021	40%	It was expected that scores would go down due to learning loss from the pandemic.
2021-2022	42%	We are making progress in closing the academic gap and returning to our pre-pandemic RISE scores.

Expenditures:

\$179,804 on salaries and benefits for ELA teachers.
