Welcome

Reviewed voting process for Lands Trust Committee - Sept. 15

Set dates for 2020-21 Lands Trust Meetings

Approve Rules of Order

Report on how funds spent and amount given 2019-20

How funds were used and what was accomplished.

SJ

Goal - Teachers will learn how to increase student learning through use of engagement strategies and increased rigor activities through training by Innovations Educational Consulting and tracking through CoachUp Instructional Database .

Students benefited in that they were consistently engaged more in the learning process and teachers were constantly checking for understanding. Once they understood where students were in their learning they could adjust instruction and engage students in learning.

Goal

Increase the percent of students' proficiency on ELA by increasing the amount of time that students are in class receiving instruction.

Students benefited by being in class more and not out of the classroom due to discipline issues.

Goal

Increase student learning on computer science concepts and increase student keyboarding skills.

Students benefited by increased skills in typing in order to write without keyboarding slowing down their ability to express their knowledge.

Goal

Student learning on core concepts will increase through integration of technology in their learning.

Students benefited through better utilization of online learning programs that supported the skills and knowledge base of students. Once we were 100% online due to COVID, it helped students navigate the learning platforms and helped the school plan for the 2020-21 school year where some students could not attend in person and needed to learn online.

Salaries and Employee Benefits (100 and 200)	\$67,426
Professional and Technical Services (300)	\$9,500
General Supplies (610)	\$300

Monies were spent in all areas but \$4,000 for salaries. COVID caused the closure of the schools and the last training for teachers on engagement did not occur. This money is projected to carry forward for the 2019-2020 school year.

WJ

GOAL

Student proficiency will increase through increased engagement and participation in classroom discussion and activities.

Students benefited in that they were consistently engaged more in the learning process and teachers were constantly checking for understanding. Once they understood where students were in their learning they could adjust instruction and engage students in learning.

Goal

Provide math materials for student practice and instruction that align with the Utah Core.

Students benefited by having a curriculum that is better aligned with the state core standards and that provide a curriculum that guides students in gaining knowledge and proficiency on these standards.

Goal

Students will increase their understanding of academic core concepts and completion of assignments in math, science and ELA.

Student benefited by increasing study skills to help them in all areas of learning. Students also received Tier 2 interventions in areas where they were struggling.

Goal

Student learning on core concepts will increase through integration of technology in their learning.

Students benefited through better utilization of online learning programs that supported the skills and knowledge base of students. Once we were 100% online due to COVID, it helped students navigate the learning platforms and helped the school plan for the 2020-21 school year where some students could not attend in person and needed to learn online.

Salaries and Employee Benefits (100 and 200)	\$64,453
Professional and Technical Services (300)	\$8,650
Textbooks (641)	\$18,746
Textbooks (Online Curriculum or Subscriptions) (642)	\$4,000

Monies were spent in all areas but \$6,000 for salaries. COVID caused the closure of the schools and the last training for teachers on engagement did not occur. This money is projected to carry forward for the 2019-2020 school year.
